ITARY COMMISSIONER'S OFFICE,
LAHORE:
The 13th January 1885.

H. W. BELLEW,
Deputy Surgeon-General,
Sanitary Commissioner, Punjab.

Remarks by the Sanitary Commissioner, Punjab, on the general health of the Province during the week ending Saturday, the 27th December 1884.

THE total deaths registered from all causes in the Province were 12,549 against 13,388 in the previous week and 9,299 in the corresponding week of the past year, giving, respectively, an annual death-rate of 36·1, 37·2 and 25·6 per 1,000 of population.

There was not a single death registered under the head of cholera.

From small-pox 105 deaths were registered against 89 in the previous week and 217 in the corresponding week of the past year.

From fevers there were 9,375 deaths against 10,141 in the previous week and 6,334 in the corresponding week of the past year.

From bowel-complaints 378 deaths against 411 and 202; chest disease, 612 against 630 and 536; snake-bite, 2 against 1 and 0; hydrophobia, 3 against 1 and 1; and all other causes, 2,691 against 2,745 in the previous week and 2,546 in the corresponding week of the past year.

Three thousand two hundred and thirty-five deaths were registered in the Province amongst infants under one year of age, of which number 1,657 were males and 1,578 females.

In the 47 large Municipal towns 949 deaths were registered (507 males and 442 females), giving a death-rate of 38 per mille of population; 1,003 births were registered (520 males and 483 females), giving a birth-rate of 40 per mille of population.

20,154·70	38,039·97	17,885·27	...	This increase in edible grain traffic is in a great measure due to the bumper harvest of 1884, which rendered grain plentiful and cheap, and consequently encouraged calls for exports. The bulk of this traffic proceeded in the direction of Kurrachee, and, with the exception of an increase of 3,000 tons sent to the East Indian Railway in November of this year, the rest of the total increase may be ascribed to Kurrachee traffic. Of this, however, 10,000 tons is attributable to traffic from the Punjab Northern State Railway in the direction of Kurrachee. The proportion from this line would greatly appear had there not been a considerable decrease in traffic from stations on this line *viâ* the Rájputána-Málwa Railway.
1,239·33	4,821·41	3,582·08	...	This is principally due to an increase in the quantity of rice despatched from Amritsar and Sahárunpur to the Rájputána-Málwa Ráilway.

SANITARY COMMISSIONER'S OFFICE,
Lahore:
The 20th January 1885.

H. W. BELLEW,
Deputy Surgeon-General,
Sanitary Commissioner, Punjab.

Remarks by the Sanitary Commissioner, Punjab, on the general health of the Province during the week ending Saturday, the 3rd January 1885.

THE return is incomplete, the registers of Shahpur, Muzaffargarh, Bannu Districts and Rural Circles of Kohát not having been received. Comparing the results of the districts for which complete returns have been received, the total deaths registered from all causes in the Province were 10,838 against 13,106 in the previous week and 9,832 in the corresponding week of the past year, giving, respectively, an annual death-rate of 32·1, 36·1 and 27·1 per 1,000 of population.

There was not a single death registered under the head of cholera.

From small-pox 115 deaths were registered, against 105 in the previous week and 321 in the corresponding week of the past year.

From fevers there were 7,918 deaths, against 9,837 in the previous week and 6,329 in the corresponding week of the past year.

H. W. BELLEW, *Deputy Surgeon-General,*

Sanitary Commissioner, Punjab.

Remarks by the Sanitary Commissioner, Punjab.

THE total number of deaths registered from all causes in the Province during the month of November was 94,358, against 125,824 in the previous month and 42,764 in the corresponding month of the past year, giving an annual death-rate of 60, 80 and 27 per *mille* of population per annum respectively, the mean death ratio for the corresponding month (November) for 15 previous years being 38.

There were 4 deaths registered under the head of cholera—2 in Simla and 2 in Kángra Districts.

From small-pox, 279 deaths were registered, against 347 in the previous month and 682 in the corresponding month of the past year; fevers; 76,985 against 104,761 and 27,114; bowel complaints, 2,481 against 2,652 and 1,456.

During the month there were 18 deaths registered from suicide, against 22 in the past month; wounding, 19 against 34; accidents, 197 against 233; snake-bite or killed by wild beasts, 41 against 82; and from all other causes, 14,334 against 17,693 and 13,242 in the corresponding month of the past year.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 27th January 1885.

H. W. BELLEW,
Deputy Surgeon-General,
Sanitary Commissioner, Punjab.

Remarks by the Sanitary Commissioner, Punjab, on the general health of the Province during the week ending Saturday, the 10th January 1885.

THE total deaths registered from all causes in the Province were 9,432 against 11,314 in the previous week and 9,364 in the corresponding week of the past year, giving, respectively, an annual death-rate of 26·5, 32·1 and 25·8 per 1,000 of population.

There was not a single death registered under the head of cholera.

From small-pox 116 deaths were registered, against 115 in the previous week and 358 in the corresponding week of the past year.

From fevers there were 6,814 deaths, against 8,325 in the previous week and 5,826 in the corresponding week of the past year.

From bowel-complaints, 244 deaths against 314 and 221; chest disease, 577 against 592 and 692; snake-bite 1 against 0 and 2; hydrophobia, 2 against 4 and 5; and all other causes, 2,258 against 2,560 in the previous week and 2,958 in the corresponding week of the past year.

Two thousand four hundred and forty-four deaths were registered in the Province amongst infants under one year of age, of which number 1,263 were males and 1,181 females.

In the 49 large Municipal towns, 794 deaths were registered (451 males and 343 females) giving a death-rate of 31 per mille of population; 970 births were registered (506 males and 464 females), giving a birth-rate of 38 per mille of population.

ARJAN DAS, *Supdt.*,
Office, Settlements and Agriculture, Punjab.

Remarks by the Sanitary Commissioner, Punjab, on the general health of the Province during the week ending Saturday the 17th January 1885.

THE return is incomplete, the registers of Delhi, Muzaffargarh and Bannu Districts not having been received. Comparing the results of the Districts for which complete returns have been received the total deaths registered from all causes in the Province were 9,819 against 9,432 in the previous week and 8,663 in the corresponding week of the past year, giving respectively an annual death-rate of 29·1, 26·5 and 23·9 per 1,000 of population.

There was not a single death registered under the head of cholera.

From small-pox 101 deaths were registered against 116 in the previous week and 341 in the corresponding week of the past year.

From fevers there were 6,967 deaths against 6,814 in the previous week and 5,321 in the corresponding week of the past year.

From bowel-complaints 249 deaths against 244 and 223; chest disease 612 against 577 and 660; snake-bite 1 against 1 and 0; hydrophobia 2 against 2 and 2; and all other causes 2,502 against 2,258 in the previous week and 2,778 in the corresponding week of the past year.

Two thousand six hundred and sixty-eight deaths were registered in the Province amongst infants under one year of age, of which number 1,426 were males and 1,242 females.

In the 46 large Municipal towns 688 deaths were registered (387 males and 301 females), giving a death-rate of 32 per mille of population; 791 births were registered (410 males and 381 females), giving a birth-rate of 36 per mille of population.

[SAN]ITARY COMMISSIONER'S OFFICE,
LAHORE:
The 10th February 1885.

H. W. BELLEW,
Deputy Surgeon-General,
Sanitary Commissioner, Punjab.

Remarks by the Sanitary Commissioner, Punjab, on the general health of the Province during the week ending Saturday the 24th January 1885.

THE return is incomplete, the registers of Jhelum and Kohát Rural Circles not having been received. Comparing the results of the Districts for which complete returns have been received the total deaths registered from all causes in the Province were 9,048 against 10,617 in the previous week and 8,342 in the corresponding week of the past year, giving respectively an annual death-rate of 26·0, 29·8 and 23·0 per 1,000 of population.

There was not a single death registered under the head of cholera.

From small-pox 143 deaths were registered against 101 in the previous week and 346 in the corresponding week of the past year.

From fevers there were 6,332 deaths against 7,609 in the previous week and 5,081 in the corresponding week of the past year.

From bowel-complaints 203 deaths against 267 and 170; chest disease 566 against 633 and 685; snake-bite 1 against 1 and 1; hydrophobia 3 against 2 and 1; and all other causes 2,370 against 2,640 in the previous week and 2,745 in the corresponding week of the past year.

Two thousand six hundred and two deaths were registered in the Province amongst infants under one year of age, of which number 1,320 were males and 1,282 females.

In the 49 large Municipal towns 709 deaths were registered (376 males and 333 females), giving a death-rate of 28 per mille of population; 913 births were registered (458 males and 455 females), giving a birth-rate of 36 per mille of population.

LAHORE:
The 10th February 1885.

H. W. BELLEW, *Deputy Surgeon-General,*
Sanitary Commissioner, Punjab.

50·65	34·61	...	16·04	
30,405·25	24,510·57	...	5,894·68	The traffic in edible grain in December 1883 was abnormally high owing to the great demand for export which did not exist in December 1884. The decrease is accounted for as follows :—Local eastwards traffic, decrease 45,000 maunds; from stations Lahore to Delhi to Rájputána-Málwa State Railway, 8,000 maunds; from stations Lahore to Mooltan to Indus Valley State Railway, 81,000 maunds; while there was a slight increase in local westwards and traffic to East Indian Railway and Punjab Northern State Railway.
1,126·52	1,475·28	348·76	...	This increase is attributable to a greater quantity of rice received in December 1884 from the Punjab Northern State Railway at Ganda Singh and Ludhiána, and about 1,000 maunds received at the latter station from the Amritsar-Pathánkot Railway.
490·84	680·52	189·68	...	
539·34	741·47	202·13	...	This is merely a fluctuation.
171·53	106·60	...	64·93	
439·89	1,347·97	908·08	...	This increase is due to a quantity of manufactured iron being received in December 1884, from the Indus Valley State Railway at Amritsar and from the East Indian Railway at Saháranpur: the latter presumably for construction of the Oudh and Rohilkhand Railway extension to Saháranpur.

4,254·99	5,045·00	790·01	...	This is due to a larger quantity of salt being received at stations on this line from the Punjab Northern State Railway than was the case in December 1883.
7,349·60	6,562·27	...	787·33	This decrease is attributable to a smaller quantity of seeds imported to stations on this line from the East Indian Railway, Rájputána-Málwa and Punjab Northern State Railways.

6,343·45	7,210·94	867·49	...	There has been a general increase in this traffic in December 1884 as compared with the same month of 1883 both in local east and west end traffic to foreign lines, with the exception of the Indus Valley State Railway, to which line the quantity despatched is nearly the same as in December 1883.
329·17	203·33	...	125·84	
3,302·46	1,634·16	...	1,668·30	This decrease is entirely due to a large quantity of timber having been received at Kána from the Punjab Northern State Railway in December 1883.
2,725·82	3,785·19	1,059·37	...	This increase is due to fuel from Chánga Mánga for the Punjab Northern State Railway.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 17th February 1885.

H. W. BELLEW,
Deputy Surgeon-General,
Sanitary Commissioner, Punjab.

Remarks by the Sanitary Commissioner, Punjab, on the general health of the Province during the week ending Saturday the 31st January 1885.

The return is incomplete, the registers of Dera Gházi Khan and Bannu Rural Circles not having been received. Comparing the results of the Districts for which complete returns have been received, the total deaths registered from all causes in the Province were 8,585, against 9,048 in the previous week and 8,408 in the corresponding week of the past year, giving respectively an annual death-rate of 24·6, 26·0 and 23·2 per 1,000 of population.

There was not a single death registered under the head of cholera.

From small-pox 126 deaths were registered, against 143 in the previous week and 366 in the corresponding week of the past year.

From fevers there were 5,886 deaths, against 6,332 in the previous week and 5,165 in the corresponding week of the past year.

From bowel-complaints 188 deaths against 203 and 194; chest disease 542 against 566 and 639; snake-bite 2 against 1 and 1; hydrophobia 0 against 3 and 2; and all other causes 2,385 against 2,370 in the previous week and 2,683 in the corresponding week of the past year.

Two thousand four hundred and seventy-eight deaths were registered in the Province amongst infants under one year of age, of which number 1,226 were males and 1,252 females.

In the 49 large Municipal towns 587 deaths were registered (293 males and 294 females), giving a death-rate of 23 per mille of population; 1,002 births were registered (466 males and 536 females), giving a birth-rate of 40 per mille of population.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 10th March 1885.

H. W. BELLEW,
Deputy Surgeon-General,
Sanitary Commissioner, Punjab.

Remarks by the Sanitary Commissioner, Punjab, on the general health of the Province during the week ending Saturday, the 21st February 1885.

THE total deaths registered from all causes in the Province were 7,776 against 8,002 in the previous week and 8,611 in the corresponding week of the past year, giving respectively an annual death-rate of 21·4, 22·1 and 23·8 per 1,000 of population.

There was not a single death registered under the head of cholera.

From small-pox 114 deaths were registered against 109 in the previous week and 408 in the corresponding week of the past year.

From fevers there were 5,191 deaths against 5,421 in the previous week and 5,190 in the corresponding week of the past year.

From bowel complaints 163 deaths against 179 and 174; chest disease 555 against 525 and 786; snake-bite 3 against 3 and 1; hydrophobia 1 against 1 and 8; and all other causes 2,308 against 2,293 in the previous week and 2,839 in the corresponding week of the past year.

Two thousand four hundred and twenty-two deaths were registered in the Province amongst infants under one year of age, of which number 1,247 were males and 1,175 females.

In the 49 large Municipal towns 587 deaths were registered (307 males and 280 females) giving a death-rate of 23 per mille of population; 904 births were registered (485 males and 419 females), giving a birth-rate of 36 per mille of population.

the Month of January 1885 *as compared with the same month of the previous year.*

Total 1884.	Total 1885.	Increase, 1885.	Decrease, 1885.	REMARKS.
Tons.	Tons.	Tons.	Tons.	
432·91	898·89	465·98	...	This increase is due to a greater quantity of coal having been brought to Lahore than was the case in January 1884.
455·72	1,455·90	1,000·18	...	This increase is entirely due to despatches of cotton from Umballa City and Sahárunpur to the East Indian Railway. None was sent from these stations in January 1884.
705·06	402·75	...	302·31	The falling-off in the quantity of this staple is due to a decrease in imports to Amritsar from the East Indian and Indus Valley State Railways.
205·68	176·52	...	29·16	
110·90	107·78	...	3·12

10·16	7·19	...	2·97	
23,616·11	29,033·83	5,417·72	...	The increase in the traffic in this staple appears due to increased demand for export. The exports *viâ* the East Indian, Rájputána-Málwa and Indus Valley State Railways show increases of 2,000 tons, 2,000 tons and 9,000 tons respectively,—4,000 tons of the latter being entirely due to traffic *viâ* the Indus Valley State Railway from stations between Lahore and Phillour. There has, however, been a considerable decrease in local traffic, as follows:—Local eastwards 6,000 tons, and local westwards 1,000 tons, approximately.
1,209·54	1,574·90	365·36	...	This increase is entirely due to increased despatches from stations—Sahárunpur to Muzaffarnagar to the Rájputána-Málwa Railway and Lahore to Sahárunpur to the Punjab Northern State Railway. There has been a considerable decrease in local traffic, but not sufficient to call for special remark. Local bookings being always subject to accidental fluctuations.
514·50	649·29	134·79	...	
289·89	575·20	285·31	...	This appears a mere fluctuation.

64·76	74·42	9·66	...	
132·17	342·39	210·22	...	This is due to an increase in the quantity of kerosine oil sent from Delhi to stations on this line and also to the importation of a larger quantity *viâ* the Indus Valley State to the Punjab Northern State Railway.
4,312·55	4,203·84	...	108·71	
5,962·37	4,168·99	...	1,793·38	This decrease is due to a falling-off in the quantity of seeds sent to Meerut City from the Punjab Northern State Railway and to Ludhiána from the East Indian Railway. There is also a decrease of about 600 tons in traffic from Murádnagar Ghát to Delhi.
28·05	4·21	...	23·84	
0·25	8·79	8·74	...	
6·71	0·50	...	6·21	
684·23	995·80	311·57	...	This appears to be simply a fluctuation.
12,021·38	8,401·35	...	3,620·03	Three thousand tons of this decrease is attributable to a decrease in the quantity of seeds received at Muzaffarnagar and Meerut City from the Rájputána-Málwa Railway, the rest to a falling-off in the traffic received at these stations from the East Indian Railway and a general decrease in local eastwards traffic.
183·24	223·36	40·12	...	
2,516·52	1,086·77	...	1,429·75	This decrease is due to a falling-off in the quantity of timber despatched from the Punjab Northern State Railway to Amritsar and Ráewind also from the Punjab Northern State Railway to the Rájputána-Málwa Railway.
2,195·51	4,639·89	2,444·38	...	This increase is chiefly due to a large quantity of fuel having been despatched to the Punjab Northern State Railway from Chánga Mánga in January 1885. None was sent in the corresponding month in 1884.

DELHI RAILWAY.

the Month of February 1885 *as compared with the same month of the previous year.*

Total 1884.	Total 1885.	Increase, 1885.	Decrease, 1885.	REMARKS.
563·85	217·52	...	346·33	This decrease is the result of a smaller quantity of Sindh, Punjab and Delhi Railway coal having been received from the East Indian Railway than was the case in February 1884.
212·19	671·41	459·22	...	This increase is chiefly due to a quantity of cotton having been despatched from Umballa City to the East Indian Railway during February 1885.
679·90	887·84	207·94	...	This increase is due to a larger quantity of cotton having been imported by Amritsar from the Indus Valley State Railway than was the case in February 1884.

6·53	6·50	...	0·3	
24,803·58	36,636·92	11,833·34	...	This increase is chiefly attributable to a much larger quantity of grain despatched from the Punjab to Kurrachee than was the case in February 1884, owing to an increased demand for export, consequent on higher prices being obtainable for staples. There is approximately an increase of 20,232 tons in traffic to Kurrachee, about 4,000 tons of which came from the Amritsar-Patháнkot Railway, 1,100 tons to the East Indian Railway, and 733 tons from the Rájputána State Railway. Against these increases, however, the following decreases must be reckoned local east and westwards traffic : 10,200 tons altributable as a natural sequence to the increased export traffic.

2,928·50	5,886·29	2,957·79	...	There is an increase of 2,000 tons of salt despatched from the Punjab Northern State Railway to stations on this line as compared with February 1884. The remainder of the increase is due to a quantity of 250 tons from the Punjab Northern State Railway to the Amritsar-Patháнkot Railway, the rest to an increase in the quantity received at Saháranpur, Muzaffarnagar and Meerut City from the Rájputána State Railway.
4,044·85	3,334·46	...	710·39	This decrease is due to a general falling-off in local traffic and to a comparatively small quantity of seeds having been received from the Punjab Northern State Railway by stations on this line as compared with February 1884.

1,137·76	2,439·37	1,301·61	...	This increase is chiefly due to traffic from Muzaffarnagar to the Rájputána State Railway and from the East Indian to the Punjab Northern State Railway.
10,541·73	10,063·99	...	477·74	This decrease is chiefly due to a decrease in the quantity of jaggree, shakkar and gur despatched to the Rájputána State Railway from stations between Sahéranpur and Delhi; there is also a general decrease in local traffic in these staples.
202·34	154·44	...	47·90	
1,264·83	963·26	...	301·57	This decrease is due to a comparatively large quantity of timber being sent in February 1884 to the Punjab Northern State Railway from Ganda Singh, Amritsar and Phillour; also to a general falling-off in local traffic.
3,580·52	5,054·62	1,474·10	...	This increase is accounted for by a large quantity of fuel having been despatched to the Punjab Northern State Railway from stations on the Mooltan District of this line.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 14th April 1885.

H. W. BELLEW,
Deputy Surgeon-General,
Sanitary Commissioner, Punjab.

Remarks by the Sanitary Commissioner, Punjab, on the general health of the Province during the week ending Saturday the 28th March 1885.

The total deaths registered from all causes in the Province were 7,194, against 7,202 in the previous week and 7,988 in the corresponding week of the past year, giving respectively an annual death-rate of 19·8, 19·8 and 22·0 per 1,000 of population.

There was not a single death registered under the head of cholera.

From small-pox 203 deaths were registered, against 100 in the previous week and 366 in the corresponding week of the past year.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 21st April 1885.

H. W. BELLEW,
Deputy Surgeon-General,
Sanitary Commissioner, Punjab.

Remarks by the Sanitary Commissioner, Punjab, on the general health of the Province during the week ending Saturday the 4th April 1885.

THE return is incomplete, the registers of Jhang and Bannu Districts not having been received. Comparing the results of the districts for which complete returns have been received, the total deaths registered from all causes in the Province were 6,895, against 7,302 in the previous week and 8,230 in the corresponding week of the past year, giving respectively an annual death-rate of 19·0, 20·1 and 22·7 per 1,000 of population.

From small-pox 90 deaths were registered, against 203 in the previous week and 368 in the corresponding week of the past year.

From fevers there were 4,655 deaths, against 4,806 in the previous week and 4,930 in the corresponding week of the past year.

From bowel complaints 197 deaths against 189 and 221; chest disease 453 against 523 and 668; snake-bite 8 against 7 and 4; hydrophobia 1 against 1 and 1; and all other causes 1,953 against 2,104 in the previous week and 2,711 in the corresponding week of the past year.

One thousand eight hundred and ninty-one deaths were registered in the Province amongst infants under one year of age, of which number 990 were males and 901 females.

In the 47 large Municipal towns 520 deaths were registered (275 males and 245 females), giving a death-rate of 21 per mille of population; 670 births were registered (329 males and 341 females), giving a birth-rate of 27 per mille of population.

There were no deaths registered from cholera during the week under review but in the subsequent week.

Seventeen deaths from cholera have been reported to this office by Civil Surgeons demi-officially and by telegrams, thus—

In Delhi 7 seizures 2 deaths (1 in Bazár Síta Rám and the other in the Hospital).
Karnál 1 seizure 1 death in the Sadr Bazár.

Umballa	11 seizures	8 deaths, *viz.*,	7 in Jagádhri town and 1 Chappar Police Station.
Amritsar	5 ,,	3 ,,	at Railway Station.
Lahore	3 ,,	2 ,,	1 at Railway Station, Meean Meer, and 1 Mayo Hospital.

Published by Authority.

LAHORE, THURSDAY, APRIL 30, 1885.

PART I.
STATISTICAL.

WEATHER, HEALTH AND CROP REPORT FOR THE WEEK ENDING 28th APRIL 1885.

Hissar.—A few cases of cholera at Sirsa; rabi being harvested; prices stationary.

Delhi.—Health fair; sporadic cases of cholera still being reported; reaping in progress; prices slightly rising.

Umballa.—No rain; a few cases of cholera owing to pilgrims returning from Hardwár; rabi being harvested; prices slightly rising.

Jullundur.—Four tenths rain; health and crop prospects good; prices stationary.

Ferozepore.—One tenth rain at Zíra; health good; rabi being cut; prices stationary.

Amritsar.—No rain; health and crop prospects good; prices stationary.

Siálkot.—One inch rain; damage to wheat expected if more rain falls; health good; prices low and stationary.

Lahore.—Slight rain; health good; a few cases of cholera in the suburbs of Lahore—mostly amongst Hardwár pilgrims; state of crops fair; prices stationary.

Mooltan.—One tenth rain at Sadr; health good; rabi being cut; prices slightly falling.

Ráwalpindi.—Four tenths rain; health good; rabi outturn above average in 6 and average in 1 tahsíl; prices falling.

Shahpur.—Slight rain in Khusháb Tahsil; health good; rabi being harvested; prices stationary.

Dera Ismail Khan.—Seven cents rain; health and prospects good; prices stationary.

Pesháwar.—Two tenths rain; health good; expected yield of rabi crops average; prices of wheat and bájra falling, of barley and gram rising, and of other grains stationary.

General Remarks.—Rain general throughout the Province, except in the Delhi, Umballa and Amritsar Districts; health good; a few cases of cholera at Sirsa, Lahore and in the Umballa and Delhi districts, chiefly amongst pilgrims from Hardwár; crop prospects generally good, but damage to wheat expected in Siálkot District if more rain falls there; prices fluctuating.

Explanations :

Column 2.—*C* indicates Canal Stations.
The gauges in use are indicated thus—
a.—Dyas'.
b.—Watson's improved.
c.—Symon's improved.
d.—Glaisher's.
Stations not thus marked use the old pattern gauge.

Columns 4—10.—*F.* Frost.
T. Thunder.
H. Hail.
D. Dust-storm.
R. Slight rain not measured.

NOTE.—The birth and death rates of the above towns are calculated on the basis of the population enumerated in the Census of 1881.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 28th April 1885.

H. W. BELLEW,
Deputy Surgeon-General,
Sanitary Commissioner, Punjab.

Remarks by the Sanitary Commissioner, Punjab, on the general health of the Province during the week ending Saturday the 11th April 1885.

THE total deaths registered from all causes in the Province were 6,826, against 7,151 in the previous week and 8,236 in the corresponding week of the past year, giving respectively an annual death-rate of 18·8, 19·7 and 22·7 per 1,000 of population.

There was not a single death registered under the head of cholera, but later information however shows that several cases have occurred in the towns and villages, principally among the pilgrims returning from Hardwár during the weeks ending 18th and 25th April 1885.

From small-pox 98 deaths were registered, against 97 in the previous week and 387 in the corresponding week of the past year.

From fevers there were 4,538 deaths, against 4,814 in the previous week and 4,980 in the corresponding week of the past year.

From bowel complaints 205 deaths against 205 and 232; chest disease 498 against 470 and 630; snake-bite 4 against 9 and 6; hydrophobia 3 against 1 and 1; and all other causes 1,985 against 2,035 in the previous week and 2,637 in the corresponding week of the past year.

One thousand nine hundred and fifty-four deaths were registered in the Province amongst infants under one year of age, of which number 1,076 were males and 878 females.

In the 49 large Municipal towns 538 deaths were registered (304 males and 234 females), giving a death-rate of 21 per mille of population; 644 births were registered (339 males and 305 females), giving a birth-rate of 25 per mille of population.

LAHORE:
The 28th April 1885.

Tons.	Tons.	Tons.	Tons.	
657·27	394·78	...	262·49	The decrease in the quantity of coal carried is attributable to a quantity having been imported *viâ* the Indus Valley State Railway during March 1884 for Loco. purposes.
203·74	551·06	347·32	...	This increase is chiefly attributable to despatches from Umballa City towards the East Indian Railway.
1,036·95	1,239·15	202·20	...	This increase is due to increased imports of this commodity to Amritsar from the Indus Valley State Railway.

14·57	12·55	...	2·02	
15,799·04	28,558·92	12,759·88	...	Of this large increase 342,000 maunds is attributable to export *viâ* the Indus Valley State Railway. This quantity includes 28,000 maunds of cheap grains despatched to Sukkur at the *reduced rate* brought into force on 20th January 1885, *but which has been temporarily suspended on the motion of the Indus Valley State Railway.* There is also an increase of 17,000 maunds despatched from stations on the Mooltan section to the Punjab Northern State Railway. This unusual traffic is accounted for by supplies having to be sent to Ráwalpindi on the occasion of the recent Viceregal Darbár and Camp of Exercise there.
1,607·19	1,464·29	...	142·90

109·76	166·71	56·95	...	
695·18	911·13	215·95	...	This increase is due to an increased quantity of manufactured iron received at Sahâranpur from the East Indian Railway probably for works in connection with the Oudh and Rohilkhand Railway extension to that station.
117·44	153·01	35·57	...	
98·23	114·43	16·20	...	
385·77	609·80	224·03	...	This increase is partly due to traffic to Ferozepore and the Punjab Northern State Railway from the Indus Valley State Railway, and partly to traffic to Meerut City from the Rájputána State Railway.

56·94	77·47	20·53	...	
2,179·27	3,153·08	973·81	...	This increase is attributable to an increase in the quantity of salt despatched from the Punjab Northern State Railway to stations on this line, the East Indian and Amritsar-Pathánkot Railways, and partly to traffic to Sahâranpur, Meerut City and Morádnagar Ghát from the Rájputána-Málwa Railway.
2,397·82	1,719·72	...	678·10	This decrease is chiefly attributable to a large quantity of seeds having been despatched from Delhi to Morádnagar Ghát during March 1884 for transit *viâ* the Ganges Canal, but none has been sent during March 1885.

13·95	4·51	...	9·44	
3,187·06	3,802·71	615·65	...	The increase in the quantity of sugar carried as compared with March 1884 is due to large despatches in March 1885 to the Punjab Northern State Railway, probably on account of the Darbár at Ráwalpindi and a considerable increase in traffic from Muzaffarnagar to the Rájputána-Málwa Railway.
7,896·03	7,841·36	...	54·67	
127·51	165·46	38·95	...	
2,606·02	1,517·48	...	1,088·54	This decrease is attributable to a considerable falling-off in local traffic from Delhi to Phillour; also to a general decrease in the quantity of timber received from the Punjab Northern State Railway, the greater quantity of which in 1884 was despatched to Amritsar, Phillour and the Rájputána-Málwa Railway.
2,267·15	4,896·28	2,629·13	...	This increase is due to a large increase in despatches from Chánga Mánga and Okára to Lahore; also to large despatches from the Punjab Northern State Railway and Jallo to Ganda Singh Bunder for the Engineer's Department in connection with the bridge over the Sutlej between that station and Ferozepore.

SNOW-FALL REPORT.

Basahar (*Simla District*).—From 6th January to 8th March snow continued to fall with general uniformity over the ranges of the Sutlej Valley. The natives say they do not remember snow to have been so persistent and heavy as it has been during the past winter. The following is an abstract of the monthly falls of snow at Kilba.

January	...	15 feet 4 inches.
February	...	4 feet 10 „
March	...	4 „

Kangra (Kulu) snow-fall at Rotang Pass was measured 4½ feet and on other Passes in Kulu tahsil from ¾ to 3 feet.

Kangra (Plach) snow-fall at Basles Pass was measured 6½ feet and on other passes from 4½ to 6 feet.

Karnal.	Karnal ...	1·50	1·01	2·2	2·4	2·4	The weather has been unusually cool and pleasant owing to the falls of rain during the month.	The rabi crop was a very fine one indeed. Such an out-turn has not been known for the last ten years. The greater part has been harvested. In the "Naili" country in the north-west of Kaithal about 25 per cent. of the gram, barley, wheat and bhúsa was damaged. Slight damage was also done to the same crops in the riverain tracts of Karnál and Pánipat tahsíls.

DELHI RAILWAY.

the Month of April 1885 *as compared with the same month of the previous year.*

Total 1884.	Total 1885.	Increase, 1885.	Decrease, 1885.	REMARKS.
Tons.	Tons.	Tons.	Tons.	
783·24	1,689·71	906·47	...	This increase is attributable to a larger quantity of coal having been sent from East Indian Railway to the Punjab Northern State Railway than was the case during the corresponding period of 1884.
80·48	228·32	147·84	...	
1,304·77	1,091·98	...	212·79	The chief cause of this decrease is due to a considerable falling-off in imports to Mooltan City from the Indus Valley State Railway as compared with the same month in 1884. There is also a decrease in traffic from the Indus Valley State to the Punjab Northern State Railway.
264·58	292·28	27·70	...	
110·39	114·03	3·64	...	
90·37	98·05	7·68	...	
728·98	1,514·58	785·60	...	This increase is the natural result of the increased traffic in edible grain.
54·51	20·23	...	34·28	
310·46	286·40	...	24·06	
9·03	7·27	...	1·76	
14,510·06	35,211·23	20,701·17	...	This large increase is at once accounted for by the large despatches of grain despatched to Rindli in anticipation of an Army Corps being sent to the Front, and also for use by the men employed on the construction of the Railway through the Bolan Pass. There also appears to have been a considerable demand for export *viâ* Kurrachee during the period under review, but unfortunately considerable restrictions were imposed upon such traffic by the inability of the Indus Valley State Railway to accept more than a limited number of wagons daily for transit beyond Mooltan, and Government having preference over public traffic. Of the total increase, about 15,000 tons is due to traffic to and *viâ* the Indus Valley State Railway from stations on this line, at one of which the following percentages will give an idea of the localities from which the greater part was despatched:— Stations Mooltan to Meean Meer West 32 per cent.; Lahore to Goraya 31 per cent.; Phillour to Sirsawa 3 per cent.; Saharanpur to Delhi 34 per cent. The remainder of the increase is due to largely augmented despatches from the Punjab Northern State and Amritsar-Pathánkot Railways in the same direction. There is also a slight increase in traffic to the Rájputána State Railway from stations Saharunpur to Delhi.
1,166·05	914·51	...	251·54	This decrease is apparently a mere fluctuation.
363·	383·14	20·14	...	
341·	420·53	79·53	...	
116·63	113·77	...	2·86	
829·94	1,032·61	202·67	...	This increase is principally due to a comparatively large quantity of manufactured iron having been received at Saharanpur from the East Indian Railway and Rájputána State Railway presumably for construction of Oudh and Rohilkhand Railway extension to or junction works at that station.
146·62	143·71	...	2·91	
51·57	62·34	10·77	...	
707·49	563·88	...	143·61	
245·62	94·38	...	151·24	
68·73	75·75	7·02	...	
3,045·11	2,259·95	...	785·16	This decrease is chiefly attributable to a falling-off in traffic from the Rájputána State Railway to stations on this line as far as Saharanpur; there is also a slight fall in traffic from the Punjab Northern State to the East Indian Railway.
6,032·36	4,869·17	...	1,163·19	This decrease is chiefly attributable to a falling-off in traffic from the Punjab Northern State Railway to the Indus Valley State Railway, and from stations on this line to the Rájputána State Railway, apparently due to less demand for export of this commodity.
8·44	·18	...	8·26	
1·02	5·35	4·33	...	
12·97	6·25	...	6·72	
3,473·87	3,822·56	348·69	...	This increase appears to be a simple fluctuation in traffic.
6,553·70	7,848·23	1,294·53	...	There is a marked increase in despatches of these staples from stations on this line, notably Muzaffarnagar to the East Indian Railway, Rájputana State and Indus Valley State Railways during the month under review as compared with the corresponding period of 1884.
179·94	148·70	...	31·24	
1,460·94	1,036·29	...	424·65	This decrease is apparently a mere fluctuation, chiefly attributable to a decrease in the quantity of timber received at Amritsar from the Punjab Northern State Railway.
729·83	1,682·14	952·31	...	This increase is due to a large quantity of fuel having been forwarded from Jelloo to Gunda Singh for brick-burning operations by the Executive Engineer Ferozepore Bridge.
172·26	96·84	...	75·42	
49·29	17·85	...	31·44

PESTONJI, *Supdt.,*

Office, Director of Settlements and Revenue Records, Punjab.

RAIN RETURNS—DEPARTMENT OF AGRICULTURE, PUNJAB.

Explanations:

Column 2.—*C* indicates Canal Stations.
The gauges in use are indicated thus—
a.—Dyas'.
b.—Watson's improved.
c.—Symon's improved.
d.—Glaisher's.
Stations not thus marked use the old pattern gauge.

Columns 4—10.—*F.* Frost.
T. Thunder.
H. Hail.
D. Dust-storm.
R. Slight rain not measured.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 30th June 1885.

H. W. BELLEW,
Deputy Surgeon-General,
Sanitary Commissioner, Punjab.

Remarks by the Sanitary Commissioner, Punjab, on the general health of the Province during the week ending Saturday, the 13th June 1885.

THE return is incomplete, the registers of Umballa, Sialkot and Bannu Districts not having been received. Comparing the results of the districts for which complete returns have been received, the total deaths registered from all causes in the Province were 7,756, against 8,719 in the previous week and 10,210 in the corresponding week of the past year, giving respectively an annual death-rate of 23·3, 24·0 and 28·1 per 1,000 of population.

There were 71 deaths registered under the head of cholera in the districts noted below :—

Tons.	Tons.	Tons.	Tons.	
441·54	2,102·79	1,661·25	...	This increase is entirely due to coal imported by the Punjab Northern State Railway from Bengal.

66·30	25·19	...	41·11	
25,473·81	36,905·79	11,431·98	...	The increase in the quantity of edible grain carried over this line as compared with the corresponding month last year is principally due to a greater demand for export in traffic to the Indus Valley State Railway al ne; there is an increase of over 10,000 tons, the balance being chiefly attributable to traffic despatched to the Rájputána-Málwa Railway. There is a considerable decrease, however, in local eastwards traffic due doubtless to the increased export.

51·53	46·84	...	4·69	
429·23	698·16	268·93	...	This increase is due to traffic from the Indus Valley State Railway to stations on this line such as Jullundur city, Umballa city, Jagadhree and Muzaffarnagarh and to the Punjab Northern State Railway. There is also a slight increase in traffic from the East Indian Railway to Doraha station presumably for the Sirhind Canal Department.

3,508·22	5,007·41	1,499·19	...	There was considerable movement in these staples during the month under review as compared with 1884, due presumably to better prices, and there is an increase in traffic from all the connected lines consequent upon w ich local west traffic exhibits a falling off.
204·80	210·58	5·78	...	
1,300·87	1,957·16	656·29	...	This increase is entirely attributable to a quantity of timber having been received at Meerut City from the East Indian Railway, during the month under review.
1,171·49	6,027·98	4,856·49	...	This increase is due to a larger quantity of fuel having been despatched from Changa Manga for the Punjab Northern State Railway than was the case in May 1884, a large quantity of fuel has also been despatched during May 1885, from Jello to Ganda Singh Bunder, for construction purposes of the Sutlej bridge.

RAIN RETURNS—DEPARTMENT OF AGRICULTURE, PUNJAB.

Explanations:

Column 2.—*C* indicates Canal Stations.
The gauges in use are indicated thus—
a.—Dyas'.
b.—Watson's improved.
c.—Symon's improved.
d.—Glaisher's.
Stations not thus marked use the old pattern gauge.

Columns 4—10.—*F.* Frost.
T. Thunder.
H. Hail.
D. Dust-storm.
R. Slight rain not measured.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 5th August 1885.

H. W. BELLEW,
Deputy Surgeon-General,
Sanitary Commissioner, Punjab.

Remarks by the Sanitary Commissioner, Punjab, on the general health of the Province during the week ending Saturday, the 18th July 1885.

THE return is incomplete, the registers of Karnal District not having been received. Comparing the results of the districts for which complete returns have been received, the total deaths registered from all causes in the Province were 7,909, against 9,017 in the previous week and 8,432 in the corresponding week of the past year, giving respectively an annual death-rate of 22·5, 24·8 and 23·2 per 1,000 of population.

There were 119 deaths registered under the head of cholera in the districts noted below :—

89·93	13·88	...	76·05	
32,422·72	29,744·15	...	2,678·57	The principal fluctuations are as follows :—There has been a general falling-off in local eastwards traffic between stations Amritsar to Delhi inclusive, amounting to about 5,000 tons. There is also a decrease of about 1,000 tons in traffic to the East Indian Railway from stations between Saharunpur to Delhi. There is also a decrease of about 500 tons in this traffic from the Punjab Northern State Railway to stations on this line. Against these decreases there are slight increases in despatches to other points, the principal being to the Ràjputána State Railway over 3,000 tons, from the Ràjputána State Railway about 500 tons, to the Indus Valley State Railway about 500 tons, and to the Punjab Northern State Railway about 200 tons.
1,085·63	664·87	...	420·76	This decrease is chiefly attributable to a falling-off in local traffic, for which no special cause can be assigned.

48·20	33·41	5·21	...	
421·81	695·47	273·66	...	This increase is due to a quantity of unmanufactured iron having been imported *viâ* the Indus Valley State Railway chiefly for stations between Jullundur City and Delhi inclusive and the Punjab Northern State Railway.

8,124·67	6,470·34	...	1,654·33	There is a general falling-off in traffic in seeds during the month under review, doubtless owing to less demand for export than was the case during the corresponding month last year.

1,285·08	1,344·78	59·70	...	
742·91	4,873·80	4,130·89	...	This increase is largely due to quantities of firewood having been despatched from stations on this line to Ganda Singh Bunder for brick-burning in connection with the construction of the Sutlej Bridge to Ferozepore ; also to a greater quantity of fuel for loco. purposes having been moved than was the case in the corresponding month last year.

Peshawar.	**Peshawar** ...	**4·75**	**1·69**	**0·2**	**10·1**	**10·1**	There has been no rain to speak of during the month through the greater part of the district. It has rained, however, in Tirah and other hills round, and the streams and torrents have been well supplied with water. Some heavy rain fell in Mardán.	Prospects of crop on irrigated tracts are good. The canals have been well supplied with water. There have been no floods to break down dams and embankments. There has not been much baráni cultivation owing to want of rain.

Prices of almost every article are rising. The rise in price is partly owing to the bad quality of this year's grain which people will not buy. This has raised the value of the stocks remaining in hand. It is also partly owing to expectations of war in Afghánistán. Stock in hand sufficient.	Wheat ... Barley ... Gram ... Rice ... Maize ... Múng ...	22 41 22 11 33 19	30 52 32 12 44 15	A few cases of "Galghotu" (Glossanthrax) reported in village Lahore Tahsil Utman Bolak.	Do.	Canals supplied the usual quantity of water.

RAIN RETURNS—DEPARTMENT OF AGRICULTURE, PUNJAB.

Explanations:

Column 2.—*C* indicates Canal Stations.
The gauges in use are indicated thus—
a.—Dyas'.
b.—Watson's improved.
c.—Symon's improved.
d.—Glaisher's.
Stations not thus marked use the old pattern gauge.

Columns 4—10.—*F*. Frost.
T. Thunder.
H. Hail.
D. Dust-storm.
R. Slight rain not measured.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 4th September 1885.

A. STEPHEN,
Surgeon-Major,
Offg. Sanitary Commissioner, Punjab.

Remarks by the Sanitary Commissioner, Punjab, on the general health of the Province during the week ending Saturday, the 22nd August 1885.

THE return is incomplete, the registers of Simla, Mooltan and Dera Ghâzi Khan Districts not having been received. Comparing the results of the districts for which complete returns have been received, the total deaths registered from all causes in the Province were 7,936 against 8,047 in the previous week and 9,481 in the corresponding week of the past year, giving respectively an annual death-rate of 23·0, 22·2 and 26·1 per 1,000 of population.

There were 34 deaths registered under the head of cholera in the districts noted below :—

Name of District.	Name of Police Station.	Name of Town or Village.	Number of Deaths.
Karnâl ...	Kaithal ...	Kaithal town ...	13
Lahore ...	Sarai Mogal ...	in two villages ...	6
Do. ...	Chunian ...	Do. ...	13
Montgomery ...	Okâra ...	Warwaniwâli village ...	2

From small-pox 97 deaths were registered, against 84 in the previous week and 194 in the corresponding week of the past year.

From fevers there were 5,181 deaths, against 5,279 in the previous week and 5,686 in the corresponding week of the past year.

From bowel complaints 331 deaths, against 341 and 368 ; chest disease 396, against 390 and 549 ; snake-bite 45, against 51 and 46 ; hydrophobia, 3 against 1 and 1 ; and all other causes 2,293, against 2,315 in the previous week and 3,210 in the corresponding week of the past year.

Two thousand three hundred and sixty-one deaths were registered in the Province amongst infants under one year of age, of which number 1,240 were males and 1,121 females.

In the 47 large municipal towns 724 deaths were registered (397 males and 327 females), giving a death-rate of 30 per mille of population ; 1,050 births were registered (528 males and 522 females), giving a birth-rate of 43 per mille of population.

Lahore.	**Lahore** ...	**15·51**	**5·02**	**3·3**	**15·5**	**15·5**	Weather rather warm yet. Slight rain throughout the district. More rain wanted.	Sufficient rain has not fallen to enable the crops to yield well. In baráni lands the crops have been a failure, but there has been a fair yield where canal and well irrigation was procurable.

Amritsar.	Jail Hospital ...	19·62	6·93	3·6	12·3	12·3	Generally cloudy, but there has been very little rain in Ajnála.	Rain has been late and scanty throughout the district. The crops therefore, specially baráni, are generally backward and light. But the report of the zaildárs of all zails excepting a few zails, in the west and north-west of the district, are hopeful and favorable notwithstanding. The kharíf crop in this district is of not much account as compared with the rabi, and considered more of a cattle fodder crop than a cereal one. It is probably sufficient for the need of the people in this sense.

RAIN RETURNS—DEPARTMENT OF AGRICULTURE, PUNJAB.

Explanations :

Column 2.—*C* indicates Canal Stations.
The gauges in use are indicated thus—
a.—Dyas'.
b.—Watson's improved.
c.—Symon's improved.
d.—Glaisher's.
Stations not thus marked use the old pattern gauge.

Columns 4—10.—*F.* Frost.
T. Thunder.
H. Hail.
D. Dust-storm.
R. Slight rain not measured.

PUNJAB, IRRIGATION BRANCH.

of 1885-86 *up to* 31*st July* 1885.

Land irrigated (approximate).		Rain-fall.		Chief Crops (approximate).		Remarks.
Zilah.	Acres.	Average.	During month.	Name.	Area in acres.	
Gurdáspur	16,368	9·97	6·6	Cotton	9,387	The Bári Doáb Canal had to be closed for 6 days early in the month for silt clearence at head. The supply has otherwise been excellent: the demand has been intense. The area irrigated exceeds that of last year by 25,421 acres. The prospects of the crop are good.

RAIN RETURNS—DEPARTMENT OF AGRICULTURE, PUNJAB.

Explanations:

Column 2.—*C* indicates Canal Stations.
The gauges in use are indicated thus—
a.—Dyas'.
b.—Watson's improved.
c.—Symon's improved.
d.—Glaisher's.
Stations not thus marked use the old pattern gauge.

Columns 4—10.—*F*. Frost.
T. Thunder.
H. Hail.
D. Dust-storm.
R. Slight rain not measured.

Kohat.	**Kohat** ...	**13·13**	**1·84**	**1·6**	**18·8**	**18·8**	Pleasant.	Good rain has fallen throughout the district. Prospects of kharíf crops are on the whole very good. Rice crop is all over.
Peshawar.	**Peshawar** ...	**7·92**	**0·69**	...	**11·8**	**11·8**	There were several storms and rains in the Utmán Bolak Tahsíl during the month and to a less extent in the Mardán Tahsíl. No rain elsewhere. Enough rain in the Tirah hills to keep the Bara supplied with water.	In the irrigated tract watered by the Bara and the Shaikh-ka-Katha the cultivated area is large and the crops splendid. In most of Doáb Daudzai the crops are also very good. The Kabul and Swat rivers are very low and in some cases there has been difficulty in getting water into the cuts supplied from them and part of Hasht-nagar and some of the Pesh-áwar and Daudzai villages have suffered in consequence. Very little land has been cultivated as yet on the Swat Canal. The crops through the Swat canal country down to Nowshera have suffered from a plague of rats. The chahi crops in Yusafzai are for the most part excellent and the rain has enabled the people to plough extensively for the rabi. Barani cultivation every-where scanty and poor. Nowshera Tahsil, most of which is unirrigated, and has had no rain, is the only part where prospects are poor.

Sanitary Commissioner's Office,
Lahore:
The 1st October 1885.

A. STEPHEN, *Surgeon-Major,*
Offg. Sanitary Commissioner, Punjab.

Remarks by the Sanitary Commissioner, Punjab, on the General Health of the Province during the week ending Saturday, the 12th September 1885.

THE total deaths registered from all causes in the province were 9,960, against 9,220 in the previous week and 13,447 in the corresponding week of the past year, giving, respectively, an annual death-rate of 27·4, 25·4 and 37·1 per 1,000 of population.

There were 74 deaths registered under the head of cholera in the Districts noted below :—

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 13th October 1885.

A. STEPHEN, *Surgeon-Major*,
Offg. Sanitary Commissioner, Punjab.

Remarks by the Sanitary Commissioner, Punjab, on the general health of the Province during the week ending Saturday, the 26th September 1885.

The return is incomplete, the registers of Jullundur, Muzaffargarh and Dera Gházi Khan Districts not having been received. Comparing the results of the districts for which complete returns have been received, the total deaths registered from all causes in the Province were 10,848, against 10,408 in the previous week and 17,206 in the corresponding week of the past year, giving respectively an annual death-rate of 32·5, 29·8 and 47·4 per 1,000 of population.

There were 34 deaths registered under the head of cholera in the districts noted below:—

Name of District.	Name of Police Station.	Name of Town or Village.	Number of Deaths.
Delhi ...	Alipur ...	Bodli village ...	12
Gurgaon ...	Palwal ...	Palwal town ...	4
Rohtak ...	Kalanaur ...	Nigana village ...	2
Amritsar ...	Amritsar ...	Amritsar town ...	4

Do. ...	Sharakpur ...	Nazir Lobana ...	1
Do. ...	Bhai Bheru ...	Ranwán village ...	1
Ráwalpindi ...	Kallar ...	Bima village ...	1
Mooltan ...	Lodhrán ...	Doratta village ...	1
Do. ...	Jalálpur ...	In two villages ...	7

against 59 in the previous week and 2 in the corresponding week of the past year.

From small-pox 47 deaths were registered, against 47 in the previous week and 114 in the corresponding week of the past year.

From fevers there were 7,393 deaths, against 6,853 in the previous week and 12,752 in the corresponding week of the past year.

From bowel complaints 488 deaths, against 456 and 526; chest disease 432, against 507 and 629; snake-bite 20, against 46 and 33; hydrophobia 1, against 2 and 2; and all other causes 2,886, against 2,993 in the previous week and 3,812 in the corresponding week of the past year.

Three thousand one hundred and six deaths were registered in the Province amongst infants under one year of age, of which number 1,634 were males and 1,472 females.

In the 46 large municipal towns 1,034 deaths were registered (520 males and 514 females), giving a death-rate of 43 per mille of population; 1,335 births were registered (711 males and 624 females), giving a birth-rate of 55 per mille of population.

RAIN RETURNS—DEPARTMENT OF AGRICULTURE, PUNJAB.

Explanations:

Column 2.—*C* indicates Canal Stations.
The gauges in use are indicated thus—
a.—Dyas'.
b.—Watson's improved.
c.—Symon's improved.
d.—Glaisher's.
Stations not thus marked use the old pattern gauge.

Columns 4—10.—*F.* Frost.
T. Thunder.
H. Hail.
D. Dust-storm.
R. Slight rain not measured.

Sanitary Commissioner's Office,
Lahore:
The 27th October 1885.

A. STEPHEN, *Surgeon-Major,*
Offg. Sanitary Commissioner, Punjab.

Remarks by the Sanitary Commissioner, Punjab, on the general health of the Province during the week ending Saturday, the 10th October 1885.

THE return is incomplete, the registers of Gurgaon, Umballa, Muzaffargarh and Bannu Districts not having been received. Comparing the results of the districts for which complete returns have been received, the total deaths registered from all causes in the Province were 10,806, against 10,699 in the previous week, and 22,870 in the corresponding week of the past year, giving, respectively, an annual death-rate of 34·2, 33·9 and 72·4 per 1,000 of population.

There were 21 deaths registered under the head of cholera in the districts noted below:—

Name of District.	Name of Police Station.	Name of Town or Village.	Number of Deaths.
Hissar ...	Bhiwáni ...	Bhiwáni town ...	16
Kángra ...	Kángra ...	Jallarie village ...	1
Amritsar ...	Amritsar ...	Amritsar town ...	4

against 11 in the previous week and 1 in the corresponding week of the past year.

From small-pox 44 deaths were registered, against 51 in the previous week and 61 in the corresponding week of the past year.

From fevers there were 7,363 deaths, against 7,219 in the previous week and 18,259 in the corresponding week of the past year.

From bowel complaints 431 deaths, against 419 and 543; chest disease 492, against 509 and 718; snake-bite 20, against 34 and 15; hydrophobia 2, against 4 and 2; and all other causes 2,947, against 2,969 in the previous week and 4,006 in the corresponding week of the past year.

Three thousand two hundred and forty-one deaths were registered in the Province amongst infants under one year of age, of which number 1,664 were males and 1,577 females.

In the 42 large municipal towns 1,068 deaths were registered (505 males and 563 females), giving a death-rate of 46 per mille of population; 1,206 births were registered (599 males and 607 females), giving a birth-rate of 52 per mille of population.

Lahore.	**Lahore** ...	**17·60**	**0 60**	**0·60**	...	**15·5**	...	**15·5**	Dry. Nights cold but days rather warm.	A very poor yield is expected from kharif owing to there being very little rain this season, as almost nothing was sown on bárani lands. The crops on well and canal irrigated lands are also expected to give but a very small outturn.

Amritsar.	Jail Hospital ...	22·02	0·55	0·55	...	13·7	...	13·7	Good.	The kharif crops of the eastern portion of the district are generally good. Those in the western portion owing to the scanty rain-fall and cessation of rain in September are poor. Rabi sowings progressing, but owing to want of rain are generally backward, especially in the western portion of the district. Rain urgently required. Above remarks apply principally to barani cultivation, but to a lesser degree to irrigated lands. In the greater part of district the crops are poor.

SIDNEY PRESTON,

Offg. Under Secy. to Govt., Punjab, P. W. D.,

Irrigation Branch.

Remarks by the Sanitary Commissioner, Punjab, on the General Health of the Province during the week ending Saturday, the 31st October 1885.

THE return is incomplete, the registers of Delhi and Bannu Districts and of Dera Ghazi Khan Rural Circles having not been received. Comparing the results of the districts for which complete returns have been received, the total deaths registered from all causes in the Province were 11,457, against 12,453 in the previous week and 27,128 in the corresponding week of the past year, giving respectively an annual death-rate of 34·0, 34·6 and 74·8 per 1,000 of population.

There were 3 deaths registered under the head of cholera, *viz.*, 1 in Sahiwal Municipal town, Shahpur District, and 2 in Shujahpur village, Police Station Jalalpur, Mooltan District, against 12 in the previous week.

From small-pox 76 deaths were registered, against 49 in the previous week and 54 in the corresponding week of the past year.

From fevers there were 7,938 deaths, against 8,810 in the previous week and 22,797 in the corresponding week of the past year.

From bowel complaints 408 deaths, against 541 and 578; chest disease 535, against 501 and 635; snake-bite 11, against 16 and 14; hydrophobia 4, against 1 and 1; and all other causes 3,032, against 3,041 in the previous week and 3,699 in the corresponding week of the past year.

Three thousand three hundred and thirty-eight deaths were registered in the Province amongst infants under one year of age, of which number 1,764 were males and 1,574 females.

In the 46 large Municipal towns, 878 deaths were registered (427 males and 451 females), giving a death-rate of 40 per mille of population; 1,101 births were registered (570 males and 531 females), giving a birth-rate of 51 per mille of population.

SANITARY COMMISSIONER'S OFFICE,
LAHORE:
The 24th November 1885.

H. W. BELLEW,
Deputy Surgeon-General,
Sanitary Commissioner, Punjab.

Remarks by the Sanitary Commissioner, Punjab, on the General Health of the Province during the week ending Saturday, the 7th November 1885.

THE return is incomplete, the registers of Delhi and Muzaffargarh Districts not having been received. Comparing the results of the districts for which complete returns have been received, the total deaths registered from all causes in the Province were 11,802, against 13,124 in the previous week and 25,827 in the corresponding week of the past year, giving respectively an annual death-rate of 34·3, 36·2 and 71·2 per 1,000 of population.

There was only 1 death registered under the head of cholera, it occurred in the village of Luni, Police Station Kuláchi, District Dera Ismail Khan; against 5 in the previous week.

From small-pox 76 deaths were registered, against 80 in the previous week and 70 in the corresponding week of the past year.

From fevers there were 8,202 deaths, against 9,249 in the previous week and 21,674 in the corresponding week of the past year.

From bowel complaints 472 deaths, against 475 and 601; chest disease 616, against 556 and 591; snake-bite 11, against 11 and 9; hydrophobia 4, against 4; and all other causes 3,051, against 3,315 in the previous week and 3,482 in the corresponding week of the past year.

Three thousand two hundred and ninety-seven deaths were registered in the Province amongst infants under one year of age, of which number 1,654 were males and 1,643 females.

In the 46 large Municipal towns, 817 deaths were registered (398, males and 419 females), giving a death-rate of 38 per mille of population; 1,018 births were registered (515 males and 503 females), giving a birth-rate of 47 per mille of population.

84·35	25·68	...	58·67	
25,515·98	68,584·85	43,068·87	...	This large increase is entirely due to export traffic occasioned by good prices obtainable in the European markets. The increase in traffic despatched *viâ* the Indus Valley State Railway, as compared with the corresponding month last year, amounts to 962,000 maunds, and *viâ* the Bombay-Baroda and Central India Railway to 3,33,000 maunds. There is also an increase of 10,000 maunds in despatches to the Punjab Northern State Railway against these increases. There is a decrease of about 100,000 maunds in local eastwards traffic, 30,000 maunds to the East Indian Railway, and a decrease of about 10,000 maunds in inwards traffic from the Punjab Northern State Railway to stations Sahâranpur to Delhi.

75·93	100·11	24·18	...	
854·00	507·52	...	346·48	This decrease is entirely due to a falling off in imports of manufactured iron to Amritsar *viâ* the Indus Valley State Railway, and in a small degree to despatches from Amritsar to the Punjab Northern State Railway being less than during the corresponding month last year.

94·38	90·95	...	3·43	
2,251·83	3,165·02	913·37	...	This increase is chiefly due to an increase in the salt traffic from the Punjab Northern State Railway to stations on this line and to the Amritsar-Pathânkot and East Indian Railways. There is also slight increase in traffic from the Bombay-Baroda and Central India Railway to stations Sahâranpur to Meerut.
4,567·52	1,281·25	...	3,186·27	This decrease is entirely due to a falling off in export traffic *viâ* the Indus Valley State Railway as compared with October 1884, during which month there was much greater demand in foreign markets for seeds and a corresponding fall in the traffic in edible grain, although the latter is liable to greater fluctuations owing to the comparatively greater bulk of despatches.

12·67	13·48	0·81	...	
1,566·64	1,218·96	...	347·68	There has been a general falling off in this traffic as compared with October 1884, the most noticable decreases being in traffic from the Indus Valley State Railway to Mooltan City and Amritsar.
1,090·22	677·14	...	413·08	There is a general falling off in this traffic also chiefly in local booking, which may be looked upon as a mere fluctuation.
213·69	258·74	45.05	...	
720·31	1,210·31	490·00	...	This increase is attributable to larger despatches from the Punjab Northern State Railway to Amritsar and Ganda Singh, the latter presumably for construction purposes of the Ferozepore bridge.
2,423·84	976·00	...	1,447·84	This decrease is attributable to a larger quantity of fuel having been despatched from Chânga Mânga to Lahore and the Punjab Northern State Railway during October 1884 than was the case during the month under review.

	PRICES OF FOOD-GRAINS.					
State of market.	Name of grain.	Price during month.	Price during same month last year.	Condition of cattle.	Health of people.	REMARKS.
		Srs.	Srs.			
Stock of food-grains high; stores are being exported.	Wheat ... Rice ... Jowár ... Bájra ... Gram ... Maize ...	35 10 40 40 40 50	38 10 55 44 51 51	No disease.	Good.	Canals working fairly. Water sufficient.
Stock sufficient.	Wheat ... Barley ... Rice ... Bájra ... Gram ... Maize ...	22 59 19 33 28 35	31 69 14 55 33 51	Generally good.	No disease.	Water in Toi and other canals, decreasing.
Prices rising. This is partly owing to the large export of grain to Kabul and Ráwalpindi, and partly to the want of rain. Stock in hand, sufficient.	Wheat ... Barley ... Gram ... Makki ... Rice ... Múng ...	23 43 28 33 11 21	30 59 37 43 14 21	Good.	Good.	Canals are generally working well, especially the Shaikh-ka-Kutha and the canals from the Bara. Water-supply considerably in excess of what is usual at this season, which is attributed to the heavy rain-fall in the spring.
Prices rising for want of rain. No large exports or imports. Grain in store sufficient for wants of district.	Wheat ... Barley ... Maize ... Rice ... Bájra ... Gram ...	26 45 40 14 32 26	34 46 49 12 34 28	A few cases of "Mokhur" (Foot and Mouth disease) in Bakot, Tahsil Abbottabad and Garbian, Tahsil Mansahra.	A few cases of small-pox amongst children in Tahsil Mansahra.	Supply from cuts from hill torrents abundant.

Remarks by the Sanitary Commissioner, Punjab, on the General Health of the Province during the week ending Saturday, the 5th December 1885.

THE return is incomplete, the registers of Delhi and its Suburbs and Rural Circles of the Jhelum and Bannu Districts not having been received. Comparing the results of the districts for which complete returns have been received, the total deaths registered from all causes in the Province were 12,287, against 13,202 in the previous week and 16,158 in the corresponding week of the past year, giving respectively an annual death-rate of 35·9, 36·4 and 44·5 per 1,000 of population.

There were 63 deaths registered under the head of cholera in the Dera Ismail Khan District:—

Owing to scanty summer rain-fall the crops generally are in a backward state, especially in half of the western part of the district. The crops on irrigated land are still being sown, but slowly in consequence of absence of moisture in soil. The crops, however, are thriving well. In the eastern part of the district large proportion of the baráni lands have been sown, and the crops are generally light and poor, but capable of becoming fair if rain falls in time. In the western portion of the district very little baráni land has been sown, but yet there is time for barley or even wheat sowings. Everything depends now upon a timely fall of rain.
